INTERNAL RISK FACTORS

A. Business Risks / Company specific Risk

- Our product is subject to frequently changing designs, patterns, customer requirements and tastes, our inability to meet such needs or preferences may affect our business.***

Designs and patterns of laminates, especially textured laminates, change frequently, based on the changing customer requirements and tastes. Even, decorative paper, which is the essential raw material for manufacturing textured laminates, is also subject to changing designs and patterns. Our products thus become vulnerable to changing market demand. Inability in successfully predicting changing customer trends could lead to obsolescence in inventory of decorative and for laminated which may turn out to be dead stock. Our inability on our part to understand the prevailing trends or our inability to forecast changes as per latest trends or understand the needs of our customers in this industry well in time may affect our growth prospects. Our management expertise lies in designing and styling of our products after identifying latest trends and customer requirements derived through valuable customer feedback and interaction. It is our endeavour to keep ourselves abreast with the latest trends in home décor and to introduce the designs accordingly to broaden our product portfolio and augment our business.

- Our Company and some of our Directors and Promoters are involved in certain legal proceedings, which, if determined adversely, may adversely affect our business and financial condition.***

Our Company is currently, and may in the future be, implicated in lawsuits in the ordinary course of our business, including lawsuits and arbitrations involving compensation for loss due to various reasons including tax matters, civil disputes, labour and service matters, statutory notices, regulatory petitions, consumer cases and other matters. Any litigation or arbitration could result in substantial costs and a diversion of effort by us and/or subject us to significant liabilities to third parties. There is at present one outstanding taxation related proceeding against our Company pending before the Honourable Commissioner of Income Tax (Appeals)-I, Ahmedabad. Apart from the outstanding appeal before the Honourable Commissioner of Income Tax (Appeals)-I, our Company has also received notices, for the assessment year 2012-13 in respect of the returns filed by our Company, under section 34(2) of the Gujarat Value Added Tax Act, 2003 which provides the

Commissioner the right to serve on a dealer a notice requiring him to appear on a date and place specified therein or cause to be produced the books of account and all evidence on which the dealer relies in support of his returns, if the Commissioner has reason to believe that detailed scrutiny of the case and rule 9(4) Central Sales Tax (Gujarat) Rules, 1970 which provides for summoning a dealer for assessment or reassessment under the Central Sales Tax Act, 1956. Further our Company has defaulted in crediting Tax Deducted at Source ('TDS') to the Central Government for the financial years 2011-12, 2012-13, 2013-14, 2014-2015 as required under the Income tax Act, 1961 and a sum of Rs. 22,564.86 is due from the Company. However, our Company has not been served with any notice from the Income tax Department for the default in crediting TDS.

The Directors and Promoters of our Company have also been served with notices, in respect of the returns filed by them for the assessment year 2013-14, under section 143(2) of the Income tax Act, 1961, which provides the assessing officer the right to call upon the assessee to provide evidence in support of his return in order to ensure that the assessee has not understated the income or has not computed excessive loss or has not under-paid the tax in any manner. The Promoters of our Company are also partners of the firms Venus Ply Industries and Anand Timber Mart ('Firms'), both of which are liable for proceedings under taxation laws. Venus Ply Industries has received notices, for the assessment year 2012-13 regarding the returns filed by the firm, under section 34(2) of the Gujarat Value Added Tax Act, 2003 and rule 9(4) Central Sales Tax (Gujarat) Rules, 1970. Venus Ply Industries has also received a notice in respect of the return filed by the firm for the assessment year 2013-14 under section 143(2) of the Income tax Act, 1961. Anand Timber Mart has defaulted in crediting of TDS to the central government for the financial years 2012-13, 2013-14, 2014-2015 as required under the Income tax Act, 1961 and a sum of Rs. 21,202 is due from the firm. However, the firm has not been served with any notice from the Income Tax Department for the default in crediting TDS.

At present, it is not possible for us to ascertain the exact amount of penalty, if any, apart from what is already disclosed above, that may be levied against our Company, the Directors, Promoters or the Firms for the defaults under the taxation laws. A summary of on going cases are presented below:-

Name of Entity	Income Tax Cases		Other Cases	
	No of Notices	Amount involved	No of Notices	Amount involved
Against Company	1	NA	2	NA
Against Promoter/Director	2	NA	-	-
Against Group Entities	1	NA	2	NA

In addition, our Company is subject to risks of litigation including public interest litigation, contract, employment related, personal injury and property damage. Our Company cannot provide any assurance that these legal proceedings will be decided in its favour. Any adverse decision may have a significant effect on our business including the financial condition of our Company, delay in implementation of our current or future project and results of operations. There can be no assurance that the results of such legal proceedings will not materially harm our business, reputation or standing in the marketplace or that our Company will be able to recover any losses

incurred from third parties, regardless of whether our Company is at fault or not. There can be no assurance that losses relating to litigation or arbitration will be covered by insurance, that any such losses would not have a material adverse effect on the results of our operations or financial condition, or that provisions made for litigation and arbitration related losses would be sufficient to cover our ultimate loss or expenditure. Details of outstanding proceedings that have been initiated against our Company, our Promoters, our Group Companies and our Directors are set forth in the section titled “Outstanding Litigation and Material Developments” starting from page number 233 of this Draft Prospectus.

3. *Over dependence on imported raw materials may affect profitability*

Major raw materials used for production of laminates include phenol, formaldehyde, melamine and decorative papers majority of which are purchased by us from domestic importers of such products. Raw materials like phenol, formaldehyde and melamine are petrol based and hence their prices are volatile. Over dependence on imports and unavailability of such products from domestic producers may adversely affect our profitability in case the trade relations of India with any of countries from where raw materials are imported get strained in future or the suppliers face any sort of problems due to internal issues of producing countries. Also significant exchange rate fluctuations may affect our Company's business as it may alter the costs of the imports significantly.

Decrease in the availability of raw materials which we require, or volatility in the price of these raw materials may significantly and adversely affect our business, financial condition and results of our operations if we are unable to estimate and accordingly adjust the prices of our product.

4. *We have a limited number of raw material suppliers. Any kind of refusal from them can hinder our production resulting into loss of our clients.*

There are a very few suppliers from whom we procure raw materials like phenol, formaldehyde and melamine and they may allocate their resources to service other clients ahead of us. While we believe that we could find additional suppliers to supply these raw materials, any failure of our suppliers to deliver these raw materials in the necessary quantities or to adhere to delivery schedules or specified quality standards and technical specifications would adversely affect our production processes and our ability to deliver orders on time and at the desired level of quality. As a result, we may lose customers and incur contractual penalties or liabilities for failure to perform contracts, which could have a material adverse effect on our business, financial condition and results of operations.

5. *Cheap substitutes and competition from unorganised players may affect the business. Further absence of entry barriers into laminates production may attract many players from both organized and unorganized sectors which will escalate competition and resultant price pressure on the products.*

The laminate industry is highly fragmented with unorganized sector forming a significant portion which leads to cheaper products entering the market. Also there are newer substitutes emerging such as plastic which is replacing laminates in its various applications. With the reduction in trade barriers, there is an increase in production of cheaper products and copying of designs which pose a competition to the existing domestic organized players. This may directly impact our Company's operations.

Further there are low entry barriers for setting up laminates manufacturing unit(s). Plant and machinery required for setting up a laminates manufacturing unit could be easily made and installed at low cost and short time. Thus, due to low investment in machinery many players from the organized as well as the un-organised sector may enter into this industry. The entry of these players may result in competition and resultant price pressure on the products.

Cheaper and substandard products are prevalent in every market segment. These products cater to a different segment of the market and do not impact our market share. However in view of our management with growing preference of the customers for branded/better quality products, there is an assured market for the products of our Company.

6. *Our operations are hazardous and could expose us to the risk of liabilities, lost revenues and increased expenses. Further our product uses paper, which may not be an environment friendly produce.*

Our operations are subject to various hazards associated with the production of resins such as the use, handling, processing, storage and transportation of hazardous materials, as well as accidents such as leakage or spillages of chemicals. Any mishandling of hazardous chemical and poisonous substances could also lead to fatal accidents. In addition, our employees operate heavy machinery at our manufacturing facilities and accidents may occur while operating such machinery. These hazards can cause personal injury and loss of life, severe damage to and destruction of property and equipment, environmental damage and may result in the suspension of operations and the imposition of civil and criminal liabilities.. In addition, we may be subject to claims of injury from indirect exposure to hazardous materials that are incorporated into our products. Liabilities incurred as a result of these events have the potential to adversely impact our financial position. While we maintain general insurance against these liabilities, insurance proceeds may not be adequate to fully cover the substantial liabilities, lost revenues or increased expenses that we might incur. Further we use paper as raw material which may not be used considered as an environment friendly produce. This could have adverse consequences on our business model in medium to long term

7. *Inability to meet our working capital requirements may have an adverse effect on our results of operations.*

Our business is working capital intensive. Major portion of our working capital is consumed towards trade receivables and inventories. Summary of our working capital position is given below:-

We have been sanctioned fund based working capital limits of Rs. 500 lakhs from the existing bankers. The business is working capital intensive and involves a lot of investment in inventory as well as debtors. We intend to continue growing by reaching out to newer customers and also increasing the sales in the existing customers. All these factors may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled “Objects of the Issue” beginning on page 90 of this Draft Prospectus.

Due to these delays in filings, our Company had on several occasions paid the requisite late fees. Also our Company has filed some forms incorrectly. While this could be attributed technical lapses and human errors, our Company has now appointed a whole time company secretary and is in the process of setting up a system to ensure that requisite filings are done appropriately with the requisite timeline.

11. Our Top 10 distributors contribute more than 75% of our gross revenues for the period ending March 31, 2014. Any loss of business from one or more of them may adversely affect our revenues and profitability.

Any decline in our quality standards, growing competition and any change in the demand for our quality standards, growing competition and any change in the demand for our services by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

However, the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Our Company and our management have been able to maintain and strengthen these business relationships over a period of time. We believe that we may not foresee substantial challenges in maintaining our business relationship with them or finding new customers.

12. Our success depends largely upon the services of our Directors and other Key Managerial Personnel and our ability to attract and retain them. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant permits/ licenses/ approvals.

Our Company has not yet obtained certain statutory and regulatory approvals, registrations and licenses such as PTEC, PTRC, registration for Shops and Establishments etc. Also we have applied for contract labour registrations and renewal of boiler certificate. Such non-compliance may result in proceedings against our Company and the Directors and such actions may directly and immediately affect our operations

22. Our Company does not have any long- term contracts with our dealers/retailers/distributors which may adversely affect our results of operations.

Our Company does not have any long-term contract with any of dealers/retailers/distributors for our products. Our inability to sell our existing products, may adversely affect our business and profitability in future.

23. Availability of inadequate labour, work stoppages and other labour problems could adversely affect our business.

We require skilled and unskilled labour for successful running of our operations. Any shortage of adequate labour and stoppage due to any labour related issues may affect smooth running of our operations.

24. Our dependency to a certain extent on contract labour for the performance of some of our operations may adversely affect our business.

Our Company rely on certain labour contractors who provide us on-site labour for performance of some of our operations. In case of failure in complying with statutory obligations by the labour contractors the same has to be fulfilled by our Company which may eventually result in an increase in our wage cost and may affect our profitability.

25. Revenues can be adversely affected if our Company would unable to maintain distribution network

Our company sells our products with the help of distribution network of various dealers/retailers/distributors. Our company has around 20 distributors across India. The distribution network sells our products to end users. Our inability to maintain our existing distribution network or to expand it further as per the requirement of our proposed increased capacities, can adversely affect our revenues. In case, if we are not able to market our manufactured products, it may affect our operations and profitability adversely.

26. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and manufacture inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory.

27. Our Company is dependent on third party transportation providers for the supply of raw materials and delivery of products.

Our Company uses services of third party transportation providers for supply of raw materials as well as delivery of finished products. Our Company relies on fleet of trucks. In the event of non availability of fleet of trucks, due to strike or any other reason may have an adverse impact on the receipt of supplies of raw material and delivery of the finished products thereby adversely affecting our operations.

28. Our Company has availed unsecured loans in past and may avail in future loans from related parties which were repayable on demand.

We have availed in past unsecured loans from related parties. For further details in relation to the unsecured loans, please refer the chapter “Financial Statements as Restated” beginning on page 176 of this Draft Prospectus. Unsecured loans may be called at any time by these Parties. In the event these loans are required to be re-paid on a short notice, our Company may have to arrange for additional funds which may impact our financials

Currently there are no outstanding loans from related parties.

29. Some of our Group Entities have incurred losses in financial year ended March 31, 2013 and one of the Group Companies has a Negative Networth.

One of Our Group Entities has incurred losses in the F.Y. 2013-14 and has a Negative Networth. For further details regarding the performance of our Group Entities, please refer to Chapter titled “Our Group Entities” on page 169 of this Draft Prospectus.

30. Our promoter and directors may have interest in our Company, other than reimbursement of expenses incurred or remuneration

Our promoter and directors may be deemed to be interested to the extent of the Equity Shares held, loans advanced by them and rent received by them or their relatives and benefits deriving

from their directorship in our Company. For further details, please refer to the chapters titled “Our Business”, “Our Promoter and Promoter Group” and “Related Party Transactions” beginning on page 122, 165 and 174 respectively of this Draft Prospectus

31. Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors.

The Company has not proposed any dividend till date. The amount of our future dividend payments, if any, will depend upon various factors such as our future earnings, financial condition, cash flows, working capital requirements, capital expenditures and other factors. There can be no assurance that we shall have distributable funds or that we will declare dividends in the future. Additionally, the terms of any financing we obtain in the future, may contain restrictive covenants which may also affect some of the rights of our shareholders, including the payment of the dividend.

32. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

33. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted clients. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

34. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments.

Modernization and technology upgradation is essential to provide better services. Although we strive to keep our technology in line with the latest standards, we may be required to implement new technology or upgrade the existing employed by us. Further, the costs in upgrading our technology could be significant which could substantially affect our finances and operations.

35. We have in the past entered into related party transactions and may continue to do so in the future.

Our Company has entered into transactions with our certain related parties. While we believe that all such transactions have been conducted on an arm’s length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the

future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation.

For details on the transactions entered by us, please refer to section “Related Party Transactions” in Section “Financial Statements” beginning on page 176 of this Draft Prospectus.

36. Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

After completion of the Issue, our Promoters and Promoters Group will collectively own 72.97 % of the Equity Shares. As a result, our Promoters together with the members of the Promoter Group will be able to exercise a significant degree of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our equity shares.

37. Compliance with, and changes in, safety, health and environmental laws and regulations may adversely affect our business, prospects, financial condition and results of operations.

Due to the nature of the our business, we expect to be or continue to be subject to extensive and increasingly stringent environmental, health and safety laws and regulations and various labor, workplace and related laws and regulations. We are also subject to environmental laws and regulations, including but not limited to:

- Environment (Protection) Act, 1986
- Air (Prevention and Control of Pollution) Act, 1981
- Water (Prevention and Control of Pollution) Act, 1974
- Hazardous Waste Management & Handling Rules, 2008
- other regulations promulgated by the Ministry of Environment and Forests and the Pollution Control Boards of the state of Gujarat

which govern the discharge, emission, storage, handling and disposal of a variety of substances that may be used in or result from the operations of our business.

The scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted and hence the costs and management time required to comply with these requirements could be significant. Amendments to such statutes may impose additional provisions to be followed by our Company and accordingly the Company needs to incur clean-up and remediation costs, as well as damages, payment of fines or other penalties, closure of production facilities for non-compliance, other liabilities and related litigation, could adversely affect our business, prospects, financial condition and results of operations.

38. Our operating results depend on the effectiveness of our marketing and advertising programs.

Our revenues are heavily influenced by product marketing, awareness and advertising. Our marketing and advertising programs may not be successful and we may, therefore, fail to attract new customers and retain existing customers. If our marketing and advertising programs are unsuccessful, our results of operations could be materially adversely affected.

The support of our employees is also critical for the success of our marketing programs and any new strategic initiatives we seek to undertake. While we can mandate certain strategic initiatives, we need the active support of our employees if the implementation of these initiatives is to be successful. The failure of our employees to support our marketing programs and strategic initiatives could adversely affect our ability to implement our business strategy and could materially harm our business, results of operations and financial condition.

39. Our insurance policies do not cover all risks, specifically risks like product defect/liability risk, loss of profits and workmen's compensation etc. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.

While we believe that we maintain insurance coverage in adequate amounts consistent with size of our business, our insurance policies do not cover all risks, specifically risks like product defect/liability risk, loss of profits and are subject to exclusions and deductibles. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

For details of insurance availed by us please refer heading titled 'insurance' in the chapter 'Our Business' beginning on page 122 of the Draft Prospectus.

40. Some of our rent/leave and license agreements may have certain irregularities.

Some of the agreements entered into by us with respect to our manufacturing facilities and other leasehold/leave and license premises may not be adequately stamped and registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute vis-à-vis the said premises and our non-compliance of local laws relating to stamp duty and registration may adversely impact the continuance of our activity from such premises.

41. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially

increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

42. Any change in interest rates and banking policies may have an adverse impact on our Company's profitability.

The Company is dependent on bank(s) and financial institution(s) for arranging the Company's Working Capital Requirements, Term Loans, etc. Accordingly, any change in the extant banking policies or increase in interest rates may have an adverse impact on the Company's profitability.

B. Risk relating to the Issue

43. Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

44. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

45. After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors;
- d. Adverse media reports on the Company or pertaining to the Laminate Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies;

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

46. The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price.

The Issue Price of our Equity Shares has been determined by book build method. This price is based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 96 of this Draft Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

47. You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor’s demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Draft Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the New Companies Act, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

48. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the

SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

EXTERNAL RISK FACTORS

49. Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.

The following external risks may have an adverse impact on our business and results of operations should any of them materialize:

- A change in the central or Gujarat state government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular;
- High rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins; and
- A slowdown in economic growth or financial instability in India could adversely affect our business and results of operations.
- Civil unrest, acts of violence, terrorists attacks, regional conflicts or situations or war involving India or other countries could materially and adversely affect the financial markets which could impact our business. Such incidents could impact economic growth or create a perception that investment in Indian companies could involve higher degree in risk which could reduce the value of the equity shares.
- National disasters in India may disrupt or adversely effect the Indian economy which in turn may affect the health of our business
- Any downgrading of Indian Sovereign rating by international credit rating agencies may negatively impact our business and access to capital

50. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in Draft Prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013 which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

51. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with SEBI ICDR Regulations contained in this Draft Prospectus.

As stated in the reports of the Auditor included in this Draft Prospectus on page 176, the financial statements included in this Draft Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Draft Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Draft Prospectus. Accordingly, the degree to which the financial information included in this Draft Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

52. The nationalized goods and services tax (GST) regimes proposed by the Government of India may have material impact on our operations.

The Government of India has proposed a comprehensive national goods and service tax (GST) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure. Given the limited liability of information in the public domain covering the GST we are unable to provide/ measure the impact this tax regime may have on our operations.

53. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realised on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain realised on the sale of

listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

54. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and the laminates industry contained in the Draft Prospectus.

While facts and other statistics in the Draft Prospectus relating to India, the Indian economy and the laminates industry has been based on various government publications and reports from government and private agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled 'Our Industry' beginning on page 109 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

55. Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares.

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the BSE could adversely affect the trading price of the Equity Shares.

56. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

57. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

58. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

59. Financial instability in Indian financial markets could adversely affect Our Company's results of operations and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

60. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing

volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

61. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the central or state governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- excise duty on certain raw materials and components;
- central and state sales tax, value added tax and other levies; and
- Other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time.

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

62. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

63. *The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.*

The occurrence of natural disasters, including hurricanes, floods, earthquakes, tornadoes, fires and pandemic disease may adversely affect our financial condition or results of operations. The potential impact of a natural disaster on our results of operations and financial position is speculative, and would depend on numerous factor The extent and severity of these natural disasters determines their effect on the Indian economy. Although the long term effect of diseases such as the H5N1 "avian flu" virus, or H1N1, the swine flu virus, cannot currently be predicted, previous occurrences of avian flu and swine flu had an adverse effect on the economies of those countries in which they were most prevalent. An outbreak of a communicable disease in India would adversely affect our business and financial conditions and results of operations. We cannot assure you that such events will not occur in the future or that our business, financial condition and results of operations will not be adversely affected.

INDIAN ECONOMY

India is set to become the world’s fastest-growing major economy by 2016 ahead of China, the International Monetary Fund (IMF) said in its recent latest forecast. India is expected to grow at 6.3 per cent in 2015, and 6.5 per cent in 2016 by when it is likely to cross China's projected growth rate, the IMF said in the latest update of its World Economic Outlook.

India's macro-economic prospects have strengthened and the country is best positioned among emerging market economies, gaining global investor's attention, says a report by ICICI Bank. The improvement in India’s economic fundamentals has accelerated in FY2015 with the combined impact of a strong Government mandate, RBI's inflation focus supported by benign global commodity prices.

Outlook for Growth

In the coming year, real GDP growth at market prices is estimated to be about 0.6-1.1 percentage points higher vis-a-vis 2014-15. This increase is warranted by four factors. First, the government has undertaken a number of reforms and is planning several more. Cumulative growth impact of these reforms will be positive. A further impetus to growth will be provided by declining oil prices and increasing monetary easing facilitated by ongoing moderation in inflation. Simulating the effects of tax cuts, declining oil prices will add spending power to households, thereby boosting consumption and growth. Oil is also a significant input in production, and declining prices will shore up profit margins and hence balance sheets of the corporate sector. Declining input costs are reflected in the wholesale price index which moved to deflation territory in January 2015.

Further decline in inflation and the resulting monetary easing will provide policy support for growth both by encouraging household spending in interest-sensitive sectors and reducing the debt burden of firms, strengthening their balance sheets. The final favourable impulse will be the monsoon which is forecast to be normal compared to last year. Using the new estimate for 2014-15 as the base, this implies growth at market prices of 8.1- 8.5 percent in 2015-16. The power of growth to lift all boats will depend critically on its employment creation potential.

Outlook for Reforms

In the months ahead, several reforms will help boost investment and growth. The budget should continue the process of fiscal consolidation, embedding actions in a medium-term framework. India's overall revenue-to-GDP ratio (for the general government) for 2014 is estimated at 19.5 percent by the IMF. This needs to move toward levels in comparator countries—estimated at 25 percent for emerging Asian economies and 29 percent for the emerging market countries in the G-20.

Since assuming office in May 2014, the new government has undertaken a number of new reform measures whose cumulative impact could be substantial.

INDIAN MANUFACTURING INDUSTRY

Introduction

India's growing economy has offered domestic entrepreneurs and international players multiple opportunities to invest. The Government of India has realised the significance of the manufacturing industry to the country's industrial development and is taking necessary steps to increase investment in this sector.

According to a report by Mckinsey and Company, India's manufacturing sector could touch US\$ 1 trillion by 2025. There is potential for the sector to account for 25-30 per cent of the country's GDP and create up to 90 million domestic jobs, by 2025.

Many foreign investors have decided to invest in the country in the recent past due to low cost of setting up of plants and available manpower. For instance, Toshiba Group has planned to make India the design, manufacturing and export hub for its lighting business, and multiply the local headcount to design lights for planned smart cities airports, stadiums, highways, warehouses and factories, said Mr Yoichi Ibi, President & CEO, Toshiba Lighting & Technology Corporation.

Market Size

Business conditions in the Indian manufacturing sector continued to improve in October, 2014 fuelled by accelerated growth of output and new orders according to the HSBC India Manufacturing Purchasing Managers' Index (PMI) data. According to the PMI, manufacturing operating conditions in India rebounded from 51 in September 2014 to 51.6 in October 2014.

Electronics goods production in India is expected to touch US\$ 104 billion by 2020. The country's electronics market is anticipated to grow to US\$ 400 billion by 2020 and expand at a CAGR of 24.4 per cent during the period 2012-2020.

The domestic market size of the chemical industry is around US\$ 118 billion and it is approximately 3 per cent of the global chemical market, according to a report by Tata Strategic Management Group. It is highly diversified with more than 80,000 chemicals and currently accounts for 15 per cent of manufacturing GDP which makes it very crucial for the economic development of the country.

The major industries that contribute to Indian economy are as shown in the below chart :

Government Initiatives

The Government of India has taken several initiatives to promote a healthy environment for the growth of manufacturing sector in the country. Some of the notable initiatives and developments are:

The government has an ambitious plan to locally manufacture as many as 181 products India currently imports at a cost of at least US\$ 18.1 billion. The move could also help infrastructure sectors such as power, oil and gas, and automobile manufacturing that require large capital expenditure and revive the Rs 1.85 trillion (US\$ 29.07 billion) Indian capital goods business.

To give its ambitious 'Make In India' programme the much needed atmosphere to succeed, the government is expected to come up with a separate set of labour laws governing the Micro, Small and Medium Enterprise (MSME) sector which forms the backbone of the manufacturing sector. The proposed new labour laws for the MSME sector will be applicable to industrial units that employ 40 or less in their workforce and will specifically address the needs of those who are employed in the small factories or manufacturing units.

Once implemented, the new labour laws will provide the ease to do business in India and will also help effectively manage labour unrest and industrial strife and lead to new entrepreneurs entering the manufacturing sector.

The Ministry of Micro, Small and Medium Enterprises (MSME) has signed a memorandum of understanding (MoU) with the International Labour Organisation (ILO) to support the Government of India's 'Make in India' programme.

The Ministry of Micro, Small and Medium Enterprises (MSME), Government of India, has been awarded ISO 9001:2008 certification, demonstrating the Ministry's mission of promoting the growth and development of MSMEs with dedication and commitment.

In accordance with the Government's 'Make in India' initiative, the Department of Industrial Policy and Promotion (DIPP) has provided a major boost to the manufacturing sector by approving 33 applications. Clearance of these 33 applications and the deregulation of Defense product List excluding a large number of components from purview of industrial licensing will provide a major impetus to advanced manufacturing in Defence sector.

India has recently increased the cap on Foreign Direct Investment in defence manufacturing to 49 per cent due to which German firms are interested in high-end electronic manufacturing in India, according to Mr Ravi Shankar Prasad, Union Minister for Communications and Information and Technology, Law and Justice, Government of India.

Road Ahead

The manufacturing sector in India is an attractive hub for foreign investments. Several mobile phone, luxury and automobile brands, among others, have set up or are looking to establish their manufacturing bases in the country.

The electronic system design and manufacturing (ESDM) industry will benefit from the government's Make in India campaign and is projected to see investment proposals worth Rs 10,000 crore (US\$ 1.57 billion) over the next two years, according to the India Electronics and Semiconductor Association (IESA).

The Indian chemical industry is also likely to touch US\$ 190 billion by the financial year 2017-18 on account of increase in demand of the chemicals from industries of various sectors.

INDIAN LAMINATE INDUSTRY

Indian HPL Industry has been consistently growing since last six to seven years. Since 2007 the Decorative Laminate Industry caught up pace with growth and is continuing with entry of new players and capacity expansion by existing ones. The industrial product has been replacing the application of materials like wall paneling and partition areas etc. Industry went on expansion spree during 2009, 2010 and 2011 and took a brief pause to utilize and consume what it installed. As per estimates, India has more than 165 Laminate producing establishments that includes all kinds of laminates. As per BSMR finding during 2013-14, India is currently having around 135 'Decorative' Laminate producing units of which around 7-8 units are non operational.

Below graph shows the number of installed Laminate producing facilities in different states of India.

Survey shows that approximately 125 plus units are considered to be presently operating in India. Although there may be few that are yet to initiate full swing commercial production, but their capacities are almost in place.

High Pressure Laminate (HPL) Production

It is observed that there has been a total production of 1.35 to 1.40 Crore sheets every month in India i.e. approximately 13.5 million sheets per month that includes export and domestic market.

The HPL production capacity has been growing year on year. In terms of number of sheets, the production has seen a growth of 12% approximately since 2010. With growth in decorative laminate demands during 2011 and 2012 by snatching up some share of reconstituted veneers and from the furniture industry (laminates are being used instead of painting the inside areas of furniture), laminates grabbed around 14% growth.

After that, growth in demand has been slow in domestic market but the number in exports, liner grade and 1.00 mm textures has maintained a fair growth enough to fuel production capacity expansions.

Now with highly competitive 1.00 mm domestic market, the capacities that are being added are largely absorbed by the "liner grade or 0.6 mm" and lower thickness material.

PRESENT HPL PRODUCTION IN INDIA

The average production of decorative laminates has crossed approximately 130 million sheets inclusive of all thicknesses but the gap between installed capacity and demand is growing bigger. During FY 2011-2012 phases that gap narrowed with sudden demand in lower thickness segment but later capacities came in place and the Decorative laminate market became a pressure driven market.

The below graph shows the gap which indicates more supply means pressure on pricing, profits etc. It is caution for any new comer that if he enters, he should be prepared for "More investments, more efforts and a long wait for margins".

PRODUCTION - ORGANISED PLAYERS

Top Brands

The chart below shows the market share of Leading HPL manufacturing companies from top brands/organized players' category. Green Lam and Merino together accounts for almost 40% of total production in India.

Top Brand Production Share per month

Mid Segment

The Mid segment category very important fraction of the decorative laminate segment as it holds 20 percent of the market share accounting to Volume share or Value, both. This category also includes few of those players who are popular in trade with their economical pricing, but are regarded as a brand, and sell majority lower thickness materials. The Graph below presents a percent and market share in decorative laminates in Indian (on the basis of total production volumes).

Mid Segment Production Share per month

* In Mid segment there are around 22 companies that have been considered on the basis of their quality, market reputation, and competing with organized/top brands in almost all the places or strongly recognized in more than six states or two regions.

ORGANISED Vs. MID Vs. UNORGANISED

Category	Qty/month (lacs)
Top Brand	56
Mid Segment	27
Unorganized	54

In terms of volumes organized or top brand category is the biggest contributor. The Indian HPL market is now being dominated by Top brands & Mid segment players. Top brands hold approximately 41% in overall share including domestic & export markets but it holds only 34 percent share in domestic

market. The domestic market is mainly led by unorganized category players who hold around 45 percent market share of Indian decorative laminate volumes.

Industry Turnover: The Indian laminate industry and trade is estimated to be of Rs. 4800 Crores per annum in 2013. By 2014 it was expected to touch Rs. 5100 Crores.

The below graph shows the year wise turnover (in Crores INR).

If we compare it to the past few years, the growth has come down by 2 to 3%. Since 2013, value wise Indian laminate industry is growing more in Liner grade or commodity materials where operating margins are already at the base level.

The actual growth in HPL in volumes of quality materials is estimated to be around 5 to 6%, considering the balance contribution to growth due to inflation effects.

Year wise HPL Industry Growth (In Crore INR / annum)

The below chart represents year wise growth registered in HPL industry turnover in India.

FUTURE OUTLOOK

In 2014 it was anticipated that industry will witness a little better growth post elections. The reasons are positive sentiments, emerging new areas and demand in already growing cities with new Government and growing commitment to work for social growth. With the emergence of new ways in retailing of laminates and other surface materials, Indian HPL industry and trade can hope for better growth, if working with systems and aggression.

BOOP film is placed for separating the layers of two adjoining sheets and pressure is applied thereafter to form proper structure. INDIAN ECONOMY

India is set to become the world’s fastest-growing major economy by 2016 ahead of China, the International Monetary Fund (IMF) said in its recent latest forecast. India is expected to grow at 6.3 per cent in 2015, and 6.5 per cent in 2016 by when it is likely to cross China's projected growth rate, the IMF said in the latest update of its World Economic Outlook.

India's macro-economic prospects have strengthened and the country is best positioned among emerging market economies, gaining global investor's attention, says a report by ICICI Bank. The improvement in India’s economic fundamentals has accelerated in FY2015 with the combined impact of a strong Government mandate, RBI's inflation focus supported by benign global commodity prices.

Outlook for Growth

In the coming year, real GDP growth at market prices is estimated to be about 0.6-1.1 percentage points higher vis-a-vis 2014-15. This increase is warranted by four factors. First, the government has undertaken a number of reforms and is planning several more. Cumulative growth impact of these reforms will be positive. A further impetus to growth will be provided by declining oil prices and increasing monetary easing facilitated by ongoing moderation in inflation. Simulating the effects of tax cuts, declining oil prices will add spending power to households, thereby boosting consumption and growth. Oil is also a significant input in production, and declining prices will shore up profit margins and hence balance sheets of the corporate sector. Declining input costs are reflected in the wholesale price index which moved to deflation territory in January 2015.

Further decline in inflation and the resulting monetary easing will provide policy support for growth both by encouraging household spending in interest-sensitive sectors and reducing the debt burden of firms, strengthening their balance sheets. The final favourable impulse will be the monsoon which is forecast to be normal compared to last year. Using the new estimate for 2014-15 as the base, this implies growth at market prices of 8.1- 8.5 percent in 2015-16. The power of growth to lift all boats will depend critically on its employment creation potential.

Outlook for Reforms

In the months ahead, several reforms will help boost investment and growth. The budget should continue the process of fiscal consolidation, embedding actions in a medium-term framework. India's overall revenue-to-GDP ratio (for the general government) for 2014 is estimated at 19.5 percent by the IMF. This needs to move toward levels in comparator countries—estimated at 25 percent for emerging Asian economies and 29 percent for the emerging market countries in the G-20.

Since assuming office in May 2014, the new government has undertaken a number of new reform measures whose cumulative impact could be substantial.

Fiscal Framework

Notwithstanding the challenging nature of the 2014-15 budget, elaborated in the Mid-Year Economic Analysis 2014-15, the Government will adhere to the fiscal target of 4.1 per cent of GDP. Despite weakness in revenue collection and delayed disinvestment, new excises on diesel and petrol (revenue yield of about 20,000 crores), reduced subsidies, and expenditure compression will ensure the commitment to discipline. India can reconcile the requirements of fiscal consolidation and the imperative of boosting public investment to revive growth and crowd-in private investment provided the right lessons are learnt. Since this is the first full budget of the new government, and especially in light of the far-reaching recommendations of the Fourteenth Finance Commission, the time is ripe for reviewing the medium-term framework and setting targets for the upcoming year against that background and taking account of the lessons of recent history. Three phases marked recent fiscal history.

- a. At first rapid growth improved all fiscal aggregates, flows and stocks. But failure to control expenditure, especially revenue expenditure, towards the end of that phase, combined with excessive counter-cyclical policies in the second phase (2009-12) led to a loss of fiscal control that contributed to the near-crisis of 2013. A casualty has been low and stagnating capital expenditure. In the third phase (2013-today), a modicum of fiscal stability has been restored. This history suggests the following strategy going forward. First, in the medium term, India must meet its medium-term target of 3 percent of GDP. This will provide the fiscal space to insure against future shocks and also to move closer to the fiscal performance of its emerging market peers. It must also reverse the trajectory of recent years and move toward the 'golden rule' of eliminating revenue deficits and ensuring that, over the cycle, borrowing is only for capital formation.
- b. Second, the way to achieve these targets will be expenditure control and expenditure switching from consumption to investment. And the secular decline in capital expenditure in the last decade has undermined India's long run growth potential. From 2016-17, as growth gathers steam and as the GST is implemented, the consequential tax buoyancy when combined with expenditure control will ensure that medium term targets can be comfortably met. This buoyancy is assured by history because over the course of the growth surge in the last decade, the overall tax-GDP ratio increased by about 2.7 percentage points, from 9.2 percent in 2003-04 to 11.9 per cent in 2007-08 even without radical tax reform.
- c. Third, the medium-term commitment to discipline cannot result in an Augustinian deferment of actions. In the upcoming year, too, fiscal consolidation must continue. However, the need for accelerated fiscal consolidation has lessened because macroeconomic pressures have significantly abated with the dramatic decline in inflation and turnaround in the current account deficit.

INDIAN MANUFACTURING INDUSTRY

Introduction

India's growing economy has offered domestic entrepreneurs and international players multiple opportunities to invest. The Government of India has realised the significance of the manufacturing industry to the country's industrial development and is taking necessary steps to increase investment in this sector.

According to a report by Mckinsey and Company, India's manufacturing sector could touch US\$ 1 trillion by 2025. There is potential for the sector to account for 25-30 per cent of the country's GDP and create up to 90 million domestic jobs, by 2025.

Many foreign investors have decided to invest in the country in the recent past due to low cost of setting up of plants and available manpower. For instance, Toshiba Group has planned to make India the design, manufacturing and export hub for its lighting business, and multiply the local headcount to design lights for planned smart cities airports, stadiums, highways, warehouses and factories, said Mr Yoichi Lbi, President & CEO, Toshiba Lighting & Technology Corporation.

Market Size

Business conditions in the Indian manufacturing sector continued to improve in October, 2014 fuelled by accelerated growth of output and new orders according to the HSBC India Manufacturing Purchasing Managers' Index (PMI) data. According to the PMI, manufacturing operating conditions in India rebounded from 51 in September 2014 to 51.6 in October 2014.

Electronics goods production in India is expected to touch US\$ 104 billion by 2020. The country's electronics market is anticipated to grow to US\$ 400 billion by 2020 and expand at a CAGR of 24.4 per cent during the period 2012-2020.

The domestic market size of the chemical industry is around US\$ 118 billion and it is approximately 3 per cent of the global chemical market, according to a report by Tata Strategic Management Group. It is highly diversified with more than 80,000 chemicals and currently accounts for 15 per cent of manufacturing GDP which makes it very crucial for the economic development of the country.

The major industries that contribute to Indian economy are as shown in the below chart :

Investments

India has become one of the most attractive destinations for investments in the manufacturing sector. Some of the major investments and developments in this sector in the recent past are:

- Hero MotoCorp has planned to invest Rs 5,000 crore (US\$ 785.79 million) in five manufacturing facilities across India, Colombia and Bangladesh, to increase its annual production capacity to 12 million units by 2020.
- Kalyan Jewellers has raised around Rs 1,200 crore (US\$ 188.59 million) from Warburg Pincus in one of the largest private equity (PE) deals in the jewellery manufacturing segment in India.
- A consortium of Chinese automobile companies has planned to make Gujarat's Sanand an electrical vehicle (EV) manufacturing hub. The consortium consisting of seven companies plans to set up the EV park at an estimated investment of US\$ 100 million.
- Gulf Oil Lubricants India has entered into a partnership with Mahindra & Mahindra. Gulf Oil will now manufacture and supply Mahindra Genuine Oil under the brand name Mahindra M-Star Super.

- Asian Paints has planned to invest Rs 2,400 crore (US\$ 377.14 million) to set up a manufacturing unit in Nanjangud in Mysore district, Karnataka. The 175 acre project has been cleared by the State High Level Clearance Committee (SHLCC).
- Pidilite Industries Ltd has approved the acquisition of adhesive business of Blue Coat Pvt Ltd for a cash consideration of Rs 263.57 crore (US\$ 41.41 million). Blue Coat is a manufacturer of industrial adhesives and textile printing chemicals
- Minda Industries Ltd has announced a joint venture (JV) with Panasonic Corp to manufacture lead acid batteries. The manufacturing plant of the JV will be based in Uttarakhand.
- Honeywell Aerospace has signed a licensing agreement with Tata Power Co Ltd's strategic engineering division (SED), enabling it to produce Honeywell's Tactical Advanced Land Inertial Navigator (TALIN) in India.
- Danfoss India, a major player in climate and energy space, inaugurated its new manufacturing, research and development (R&D) and administrative campus, built with an investment of Rs 500 crore (US\$ 78.57 million), in Oragadam, Chennai, on November 5, 2014. The plant also includes a solar power plant which will generate 1 MW of electricity, sufficient to power 10 per cent of electricity requirements of the campus. Danfoss India, a part of Danish company Danfoss Group, stated that it is taking forward the national appeal to 'Make in India', through its focus on local manufacturing and R&D in the new campus. As part of this strategy, the company is planning to make India a manufacturing cum export hub for its regional subsidiaries and source products from local suppliers, thereby creating ancillary jobs.

Government Initiatives

The Government of India has taken several initiatives to promote a healthy environment for the growth of manufacturing sector in the country. Some of the notable initiatives and developments are:

The government has an ambitious plan to locally manufacture as many as 181 products India currently imports at a cost of at least US\$ 18.1 billion. The move could also help infrastructure sectors such as power, oil and gas, and automobile manufacturing that require large capital expenditure and revive the Rs 1.85 trillion (US\$ 29.07 billion) Indian capital goods business.

To give its ambitious 'Make In India' programme the much needed atmosphere to succeed, the government is expected to come up with a separate set of labour laws governing the Micro, Small and Medium Enterprise (MSME) sector which forms the backbone of the manufacturing sector. The proposed new labour laws for the MSME sector will be applicable to industrial units that employ 40 or less in their workforce and will specifically address the needs of those who are employed in the small factories or manufacturing units.

Once implemented, the new labour laws will provide the ease to do business in India and will also help effectively manage labour unrest and industrial strife and lead to new entrepreneurs entering the manufacturing sector.

The Ministry of Micro, Small and Medium Enterprises (MSME) has signed a memorandum of understanding (MoU) with the International Labour Organisation (ILO) to support the Government of India's 'Make in India' programme.

The Ministry of Micro, Small and Medium Enterprises (MSME), Government of India, has been awarded ISO 9001:2008 certification, demonstrating the Ministry's mission of promoting the growth and development of MSMEs with dedication and commitment.

In accordance with the Government's 'Make in India' initiative, the Department of Industrial Policy and Promotion (DIPP) has provided a major boost to the manufacturing sector by approving 33 applications. Clearance of these 33 applications and the deregulation of Defence product List excluding a large number of components from purview of industrial licensing will provide a major impetus to advanced manufacturing in Defence sector.

India has recently increased the cap on Foreign Direct Investment in defence manufacturing to 49 per cent due to which German firms are interested in high-end electronic manufacturing in India, according to Mr Ravi Shankar Prasad, Union Minister for Communications and Information and Technology, Law and Justice, Government of India.

Road Ahead

The manufacturing sector in India is an attractive hub for foreign investments. Several mobile phone, luxury and automobile brands, among others, have set up or are looking to establish their manufacturing bases in the country.

The electronic system design and manufacturing (ESDM) industry will benefit from the government's Make in India campaign and is projected to see investment proposals worth Rs 10,000 crore (US\$ 1.57 billion) over the next two years, according to the India Electronics and Semiconductor Association (IESA).

The Indian chemical industry is also likely to touch US\$ 190 billion by the financial year 2017-18 on account of increase in demand of the chemicals from industries of various sectors.

INDIAN LAMINATE INDUSTRY

Indian HPL Industry has been consistently growing since last six to seven years. Since 2007 the Decorative Laminate Industry caught up pace with growth and is continuing with entry of new players and capacity expansion by existing ones. The industrial product has been replacing the application of materials like wall paneling and partition areas etc. Industry went on expansion spree during 2009, 2010 and 2011 and took a brief pause to utilize and consume what it installed. As per estimates, India has more than 165 Laminate producing establishments that includes all kinds of laminates. As per BSMR finding during 2013-14, India is currently having around 135 'Decorative' Laminate producing units of which around 7-8 units are non operational.

Below graph shows the number of installed Laminate producing facilities in different states of India.

Survey shows that approximately 125 plus units are considered to be presently operating in India. Although there may be few that are yet to initiate full swing commercial production, but their capacities are almost in place.

High Pressure Laminate (HPL) Production

It is observed that there has been a total production of 1.35 to 1.40 Crore sheets every month in India i.e. approximately 13.5 million sheets per month that includes export and domestic market. The HPL production capacity has been growing year on year. In terms of number of sheets, the production has seen a growth of 12% approximately since 2010. With growth in decorative laminate demands during 2011 and 2012 by snatching up some share of reconstituted veneers and from the furniture industry (laminates are being used instead of painting the inside areas of furniture), laminates grabbed around 14% growth.

After that, growth in demand has been slow in domestic market but the number in exports, liner grade and 1.00 mm textures has maintained a fair growth enough to fuel production capacity expansions.

Now with highly competitive 1.00 mm domestic market, the capacities that are being added are largely absorbed by the "liner grade or 0.6 mm" and lower thickness material.

PRESENT HPL PRODUCTION IN INDIA

The average production of decorative laminates has crossed approximately 130 million sheets inclusive of all thicknesses but the gap between installed capacity and demand is growing bigger. During FY 2011-2012 phases that gap narrowed with sudden demand in lower thickness segment but later capacities came in place and the Decorative laminate market became a pressure driven market.

The below graph shows the gap which indicates more supply means pressure on pricing, profits etc. It is caution for any new comer that if he enters, he should be prepared for "More investments, more efforts and a long wait for margins".

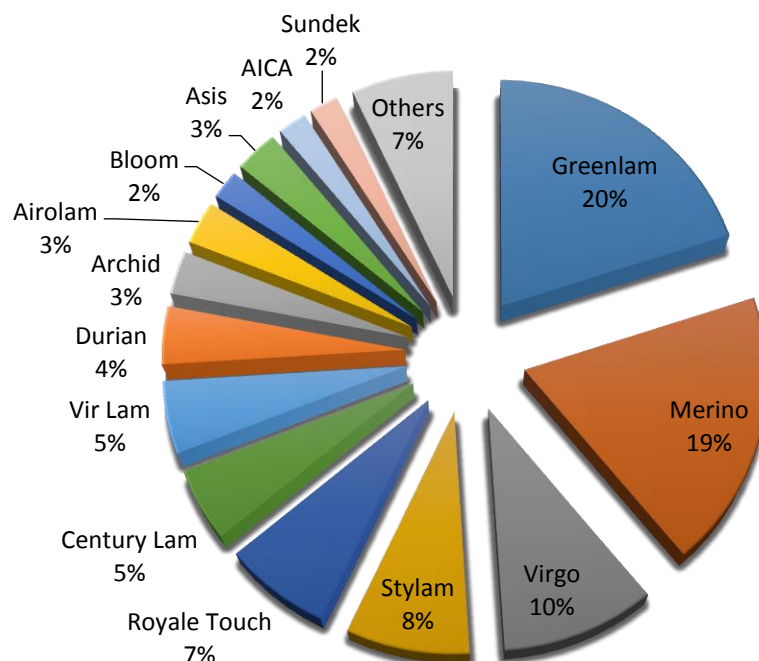

PRODUCTION - ORGANISED PLAYERS

Top Brands

The chart below shows the market share of Leading HPL manufacturing companies from top brands/organized players' category. Green Lam and Merino together accounts for almost 40% of total production in India.

Top Brand Production Share per month

Mid Segment

The Mid segment category very important fraction of the decorative laminate segment as it holds 20 percent of the market share accounting to Volume share or Value, both. This category also includes few of those players who are popular in trade with their economical pricing, but are regarded as a

brand, and sell majority lower thickness materials. The Graph below presents a percent and market share in decorative laminates in Indian (on the basis of total production volumes).

Mid Segment Production Share per month

* In Mid segment there are around 22 companies that have been considered on the basis of their quality, market reputation, and competing with organized/top brands in almost all the places or strongly recognized in more than six states or two regions.

ORGANISED Vs. MID Vs. UNORGANISED

Category	Qty/month (lacs)
Top Brand	56
Mid Segment	27
Unorganized	54

In terms of volumes organized or top brand category is the biggest contributor. The Indian HPL market is now being dominated by Top brands & Mid segment players. Top brands hold approximately 41% in overall share including domestic & export markets but it holds only 34 percent share in domestic market. The domestic market is mainly led by unorganized category players who hold around 45 percent market share of Indian decorative laminate volumes.

Volume share of HPL: Top Brands vs. Mid Segment Brands vs. Unorganised in domestic market

But the value analysis reflects the dominance of top brands which holds more than half of the market share in HPL category. The Mid Segment is almost on similar ratio be it Volume wise (number of sheets sold per month) or Value wise.

Value Wise Industry Share Among Top/Mid/Unorganised

Branded Share In 1.0 Mm Category

**The organized category includes all those companies who have either audited balance sheets or national presence with branch team and stock in place apart from other necessary recognition or it is regarded as a top brand in trade customer category pan India. (Some brands are mentioned in small form due to space constraint. Brands included are Formica & Associate)*

In mid segment category six players, Heritage, Ambition, Rotolam, Silicon, Signature and Real touch together account for almost 45% of the market of 1.0 mm, whereas rest all caters to remaining market. Although the percentage share does not reflect a big gap among brands that shows 'high degree of competition in the segment.

Mid Segment Brands Share % In 1 mm Segment

Industry Turnover: The Indian laminate industry and trade is estimated to be of Rs. 4800 Crores per annum in 2013. By 2014 it was expected to touch Rs. 5100 Crores. The below graph shows the year wise turnover (in Crores INR).

If we compare it to the past few years, the growth has come down by 2 to 3%. Since 2013, value wise Indian laminate industry is growing more in Liner grade or commodity materials where operating margins are already at the base level.

The actual growth in HPL in volumes of quality materials is estimated to be around 5 to 6%, considering the balance contribution to growth due to inflation effects.

Year wise HPL Industry Growth (In Crore INR / annum)

FUTURE OUTLOOK

In 2014 it was anticipated that industry will witness a little better growth post elections. The reasons are positive sentiments, emerging new areas and demand in already growing cities with new Government and growing commitment to work for social growth. With the emergence of new ways in retailing of laminates and other surface materials, Indian HPL industry and trade can hope for better growth, if working with systems and aggression.

Water

The water requirement for manufacturing facilities is met through our own bore well.

Fuel

At our manufacturing facility at Zak, we use coal and fire wood for boiler. At present we have 2 boilers with capacity of 4 tons and 6 tons respectively. The present usage of coal is approx.532 tons and firewood is 1377 tons approximately p.a. for the boilers.

PRODUCTION PROCESS

Production of Resin

Phenol and Formaldehyde are taken in MS jacketed vessel and blended at 100 degree Celsius to form polymeric resin of Phenol Formaldehyde. Similarly, Melamine and Formaldehyde are blended in reaction chamber to form Melamine Formaldehyde. Since these resins are very viscous they are diluted by adding solvent (Methanol).

Impregnation of Paper

The layers of these resins are applied on Decorative Paper and Kraft Paper through impregnation. They are then dried in hot air drying system.

Pressing

Decorative Paper and Kraft Paper are cut and several layers of these papers are put together according to the thickness desired. The stainless steel moulds are placed for desired finish and BOOP film is placed for separating the various layers of two adjoining sheets, before applying pressure. Thereafter hydraulic pressure at a very high temperature is applied through multi opening hydraulic press.

Cutting and Finishing

The laminated sheets thus prepared are trimmed from all the four sides and each sheet is sanded from the back for proper bonding.

Packing and Dispatch

The laminated sheets thus prepared are segregated, wrapped and packed for dispatch.

RAW MATERIALS

The principal raw material used in the manufacture of laminates comprises of kraft and decorative paper, phenol, formaldehyde and melamine. Kraft paper is sourced domestically and we source high-end and premium decorative papers from abroad domestically through domestic importers.

The principal chemicals required for the manufacture of laminates are phenol, formaldehyde, melamine and methanol from domestic suppliers.

The EPA grants the Government of India the power to take any measures it deems necessary or expedient for protecting and improving the quality of the environment and preventing and controlling pollution. Obtaining of prior environment clearance includes four stages: screening, scoping, public consultation and appraisal.

An application for environment clearance is made after the prospective project or activity site has been identified, but prior to commencing construction activity or other land preparation. Certain projects which require approval from the SEIAA may not require an EIA report. For projects that require preparation of an EIA report, public consultation involving public hearing and written responses is conducted by the State Pollution Control Board, prior to submission of a final EIA report. The environmental clearance (for commencement of the project) is valid for up to five years for all projects (other than mining projects), which may be further extended by the concerned regulator for up to five years.

The central pollution control board and state pollution control boards constituted under the Water Act perform similar functions under the Air Act as well. The Central Sales Tax Act provides for levy, collection and distribution of taxes on sales of goods in the course of inter-state trade or commerce and also declares certain goods to be of special importance in inter-State trade or commerce and specifies the restrictions and conditions to which state laws imposing taxes on sale or purchase of such goods of special importance are subject to. Sale is considered inter-state when the sale occasions movement of goods from one state to another or is effected by transfer of documents during their movement from one state to another. The liability to pay tax is on the dealer who sells the goods.

Law on Value Added Tax

Value Added Tax (***‘VAT’***) is a tax on the final consumption of goods or services. It is a multi-stage tax with the provision to allow input tax credit on tax at an earlier stage, which can be appropriated against the VAT liability on subsequent sale. This input tax credit in relation to any period means setting off the amount of input tax by a registered dealer against the amount of his output tax. BOOP film is placed for separating the layers of two adjoining sheets and pressure is applied thereafter to form proper structure. Hydraulic pressure is

also applied through multi opening hydraulic press at high temperature to create proper mould. Such laminated sheets are trimmed from all four sides and each sheet is sanded from the back for proper bonding. These laminated sheets are packed and then dispatched.

SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our business is subjected to various risks and uncertainties, including those discussed in the section titled “*Risk Factor*” beginning on page 17 of this Draft Prospectus. Our results of operations and financial conditions are affected by numerous factors including the following:

- **Competition from unorganised player and threat from national/regional players and cheaper substitute**

The laminate industry is highly fragmented with an unorganized sector forming a significant portion which leads to cheaper products entering the market. Also there are newer substitutes emerging like plastic which is replacing laminates in its various applications. With the reduction in trade barriers there is an increase production of cheaper products and copying of designs which pose a competition to the existing domestic organized players. This may directly impact the Company’s operations.

Cheaper and substandard products are prevalent in every market segment. These products cater to a different segment of the market and do not impact our market share. With growing preference of the customers for branded/better quality products, there is an assured market for the products of our Company.

- **Over dependence on imported raw materials may affect profitability**

Major raw materials used for production of laminates include phenol, formaldehyde, melamine and decorative papers majority of which are purchased by us from domestic importers of such products. Over dependence on imports and unavailability of such products from domestic producers may adversely affect our profitability in case the trade relations of India with any of countries from where raw materials are imported get strained in the future or the suppliers face any sort of problems due to internal issues of producing countries. Also significant Exchange rate fluctuations may affect the Company's business as it may alter the costs of the imports significantly.

- **Limited number of raw material supplier**

There are a very few suppliers from which raw materials like phenol, formaldehyde and melamine and they may allocate their resources to service other clients ahead of us. Any failure of our suppliers to deliver these raw materials in the necessary quantities or to adhere to delivery schedules or specified quality standards and technical specifications would adversely affect our production processes and our ability to deliver orders on time and at the desired level of quality. As a result, we may lose customers for failure to perform contracts, which could have a material adverse effect on our business, financial condition and results of operations.

- **Our ability to successfully implement our strategy**

Our growth plans are considerable and would put significant demands on our management team and other resources. Any delay in implementation of our strategy may not provide us our estimated outcome.

- **Industry Growth**

Our business is dependent on real estate industry and also on changing needs of consumer. In case of any changing customer requirements and tastes, our inability to comply with such needs or preferences may affect our business.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment.

India's current Foreign Direct Investment ("FDI") Policy issued by the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, GOI ("DIPP") by Circular 1 of 2014, with effect from April 17, 2014 ("Circular 1 of 2014"), consolidates and subsumes all previous press notes, press releases and clarifications on FDI issued by the DIPP. The Government usually updates the consolidated circular on FDI Policy once every Year and therefore, Circular 1 of 2014 will be valid until the DIPP issues an updated circular.

RBI has also issued Master Circular on Foreign Investment in India dated July 01, 2014 which is valid till June 30, 2015. In terms of the Master Circular, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

Under paragraph 6.2.5 of the current consolidated FDI Policy, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present 100% foreign direct investment through automatic route is permitted in the laminate manufacturing sector.

The transfer of shares between an Indian resident and a Non-resident does not require prior approval of FIPB or RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time. Such conditions include (i) the activities of the investee company are under the automatic route under the foreign direct investment ("FDI") Policy and the non-resident shareholding is within the sectorial limits under the FDI policy; and (ii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI. Investors are advised to refer to the exact text of the relevant statutory provisions of law before investing and / or subsequent purchase or sale transaction in the Equity Shares of Our Company.
